Dist. 8/9/2023 Ref.#53.23

Pawling WWTP Repairs DWS and JK July 2023

Priority Assignment

- 1 immediate
- 2 necessary implement after all #1's are cmpleted
- 3 Can wait for budgeting cycle

| Priority | Activity | | - 1 | ion of probal | | Comments |
|----------|---------------------------------------|----------------------|-------------|---------------|--------------|--|
| | | | low | 5.000.00 | high | Immediately saves money by allowing H2O to accomplish activities displacing Sabarese |
| _ | Purchase Mud sucker and hose | | Ş | 3,000.00 | \$ 20,000.00 | Jepardizes WWTP performance, provide installed spare without this treatment will fail if/when another blower issue occurrs |
| _ | Blower # 3 & VFD Breaker | | Þ | 8,000.00 | \$ 20,000.00 | With purchase of Mud Sucker, can be accomplished with H2O Staff. Solids buildup caused more frequent backwashes decreasing plant thruput |
| _ | Post Equalization tank Cleaning | no out of pocket | , | 2 000 00 | ć 4,000,00 | If second Non-Potable pump fails, many plant processes won't work including the Belt Press. |
| | non-potable water pump | | > | 2,000.00 | \$ 4,000.00 | OSHA Required Equipment, not fixing is big regulatory problem if there are any injuries |
| | Chemical Feed Room eye wash | | > | | \$ 30,000.00 | OSHA Required Equipment, not fixing is big regulatory problem if there are any injuries |
| | Belt Press eye wash | | Þ | 100.00 | | Quote from Evoqua Ref. # 51.23 |
| | Purchase SBR Mixer #1 Motor | | _ | 0 500 00 | | EQ Ladder installation, EQ Mixer, Digester Lid |
| 1 | 1 Day Crane Rental | | \$ | 2,500.00 | \$ 4,000.00 | EQ Ladder Histaliation, EQ Mixer, Digester tid |
| | | | ۸. | 1 000 00 | ¢ 5,000,00 | Unground waste increases loads and decreases efficiencies on downstream processes |
| | Main Grinder pump at Main PS | | Ş | 1,000.00 | \$ 5,000.00 | Safety issue |
| _ | Headworks air detection system alarms | Vender responsibilit | .у | 500.00 | ć 1,000,00 | Permanent resolution of safety issue |
| _ | EQ Ladder installation | | \$ | | | |
| 2 | SBR Mixer #1 installation | | \$ | 500.00 | \$ 1,000.00 | Coordinate with EQ Ladder |
| | | | | 2 500 00 | ć 2.500.00 | |
| | E1 Spare Grinder pump | | \$ | • | \$ 3,500.00 | |
| 3 | Pump 3 VFD at Main PS | | \$ | 1,000.00 | \$ 2,000.00 | |
| | | | | | | |
| | Add protected connection from potable | | 4 | 2 000 00 | ¢ 8,000,00 | Could be an alternative back-up supply to keep plant in operations if non potable pumps fail |
| | water supply to non-potable system | | \$ | 3,000.00 | \$ 8,000.00 | It's been this way since early 2022 so work around has provided alternative operations, risk of spills |
| 3 | Digester 1 decant Valve | no out of pocket | | | | It's been this way since early 2022 30 work around has provided alternative operations, the second s |
| | | | | | | Whenever |
| 4 | Empty magnesium Hydroxide Tank | no out of pocket | | | | AATIGUGAGI |
| | | | ė | 46 100 00 | \$ 99.550.00 | |
| | | | Ģ | 40,100.00 | \$ 99,550.00 | |
