New York State Electric & Gas Corporation
 12-Month Average Supply Rate
 For the Period 07/01/2022 - 06/30/2023

These rates are determined by summing the trailing 12-month weighted supply rate, and the trailing 12-month weighted Merchant Function Charge ("MFC"). The NYSEG gas rates are normalized to account for the impact of weather, and include the trailing 12-month net Transition Charge (difference between full-service customer and ESCO supplied customer) as well as the Merchant Function Charge ("MFC").

NYSEG Electric (\$ per kWh)

Hi Christine,

Please find our pricing below. During our conversation I had let you know that if you want to not hedge (take a position) on **all** of the energy through June 2024 you can have take any percentage you wish and dollar cost average the price hopefully giving you the opportunity for downward movement. As I had let you know pricing is not coming down like we had hoped so the only way to improve your price is to hope for the market to get better between now and December. While it is possible for this to happen I would say the odds are not good (40% chance). Normally electricity follows the natural gas market since this is the primary fuel for generating electricity but this year is seems to follow the market up but when the market comes down electric is slow to react. Since we are heading into winter gas pricing usually goes up due to heating demand. In case you are trying to time the market I have attached our most recent market report for you to review.

PRICES ARE IN \$/KWh

October 13, 2023

Kim Fontana
Superintendent of
Pawling Central Schools
515 Route 22
Pawling, NY 12564

Dear Ms. Fontana:

As part of the ongoing maintenance of our sewer pump stations, we pumped out the station that services the Pawling Elementary School on August 24, 2023. We pump it out prior to the start of the new school year in order to avoid any issues.

Unfortunately, we had a backup on September 13, 2023 and had to have an emergency pump-out by Savarese Septic in the amount of \$825.00 (copy enclosed). During this pump-out we found a blue microfiber towel caught up in the pump, a metal chain, and a large quantity of sanitary products which caused the system to backup and had the potential of causing damage to the pump (pictures enclosed).

We are asking that the school put up signage in all bathrooms instructing only to flush toilet paper and signs in the cafeteria kitchen regarding grease going into the sewer system. We also need to advise you that if these issues continue, the school may be held financially responsible for the emergency pump-outs and any repairs due to abuse of our sewer system pumps.

If you have any questions or would like to discuss, please let me know.

Sincerely,

Lauri Taylor, Chairperson
Pawling Joint Sewer Commission
